POTS INSTALL KITS · SHENZHEN, CHINA

Jack Xiao
+86-135-7074-3718
Jack_xiao@decwxon.com

Install-ready DMARC kits for POTS-replacement crews — every jack ships factory-terminated to USOC colour code with a moulded cord and plug, so a technician lands the drop and plugs in. Factory wiring removes 5–10 minutes of billable field labour per line, at a fraction of published distributor pricing — and in weeks, not a 19-week lead time.

Platform at a Glance

What ships: RJ31X jack + factory-terminated cord, USOC colour code, tested end to end

Cord end: RJ11 6P2C / 6P4C or RJ45 8P8C; cord length built to your order

Terminations: 8 screw terminals + shorting bar, colour-coded to USOC

Kit tiers: single jack → 4-line kit → 8-line kit → NEMA enclosure kit

Labour saved: 5–10 min per line — no crimping, no colour-code guesswork, no callbacks

Delivery: DDP door-to-door, customs cleared

Standard Product Families — every platform available for customization

SKU tier	Construction / specification	Options & range	Typical applications
SKU 1 · Pre-wired RJ31X	Single jack, cord terminated and 100% tested; cord length to your spec	Any cord length RJ11 or RJ45 end	Van stock, single-line adds, e-commerce resale
SKU 2 · 4-line DMARC kit	4 × pre-wired RJ31X + 66-block & cover + bridge clips + 8-pair jumper set	One bag per site your label	4-line POTS cutover at an SMB site or small MDU
SKU 3 · 8-line DMARC kit	8 × pre-wired RJ31X + 2 × 66-block & covers + clips + 8-pair cable cut to length	One bag per site	8-line cutover — matches an 8-port ATA footprint
SKU 4 · NEMA enclosure kit	NEMA/IP66 enclosure + 4-line kit + PoE splitter + DC pigtail, assembled and sealed	Wall or pole mount	Exposed or outdoor DMARC — no on-site fabrication
Add-on · Spares pack	Extra jacks, bridge clips, jumpers and glands	Bulk quantities	Truck stock, rework and service calls

All families above are **existing finished products, in current production and ready to ship** — sample quantities available immediately.

Custom Engineering & White Label

- **Wired to your standard:** pin-out, cord length, plug type and colour code built to your drawing — cords terminated and tested in-house
- **Kitted to your BOM:** one bag per site carrying your part numbers and your label
- **Volume programs:** monthly repeat orders with reserved capacity slots; tiered pricing sample → volume
- **Speed:** samples in about 15 days; production 2–4 weeks

Quality & Certification Support

- 100% continuity and polarity test on every cord before packing
- Pull test on strain relief; screw-terminal torque spot-checked
- Audited partner factories under ISO 9001; RoHS materials
- Export documentation ready for U.S. entry

Recently Shipped at Volume

Pre-wired RJ31X assemblies — repeat orders across multiple U.S. programs

66-block & cover sets, bridge clips — tens of thousands of pieces

8-pair copper jumpers — thousands of units per run

Kitted install bags built to per-site BOMs

> **One platform, your label.** Everything above ships under your brand — private label, your artwork on labels and packaging, kitted exactly to your BOM — so your customers see only your name.

Supply Terms & Delivery

Factory-direct source: direct from audited partner plants — best price at equal specification

Proven in supply: already supplying multiple U.S. deployment programs (under NDA)

Lead time: 2–4 weeks production, on-time delivery guaranteed

Dedicated logistics line: established China–U.S. export channel

> **Our biggest advantage: DDP, door to door.** We deliver duty-paid to your door — **safe** (established export channel, full documentation), **cost-saving** (no hidden freight or customs surprises), **worry-free** (we handle customs and clearance), **hassle-free** (one PO, one delivery, zero logistics work on your side).
